

# ELECTRICAL PANELS FOR SWIMMING POOL

Manufactured to suit your needs

# WARMPOOL

# WPC01

## Basic Box

### Electrical panel without transformer

Our WPC01 range is a compact electrical panel, which makes it easy to install in prefabricated filter houses. It has a differential, motor guard and clock to control the filtration system with back-up. Its UV resistant enclosure is IP65 protected for indoor or outdoor installation. Available on request for pumps from 1 - 14 A.

**Size:** 19,5x15x10 cm

**Pump:** Available from 1 - 14A

**Transformer:** -

**Remote control:** Optional

**Contactor:** Optional for pump and Chlorinator

**Clock for Filtration:** With memory 150h

**Others:** On, stop, auto button on the back of the panel.

Referencia	Descripción	PVP
WPC01	Electric panel with transformer 50W	109 €
WPC01-M	WPC050 + Remote control for lighting	125 €

## Piezo Electric Panel

### Water pump control panel

Allows you to take control of a water pump from a Piezo Electric push button. By making use of a Piezo Electric system you will avoid problems of distance between the push button and the control panel that commonly affects hydraulic systems beyond 5 metres. The panel includes all the necessary elements so that you only have to connect the push button and start working. Simple installation. Motor guard available on request for pumps from 1 - 14 A. IP65 weatherproof enclosure.

**Size:**

**Pump:** Available from 1 - 14A

**Transformer:** 24V DC for push button

**Remote control:** Optional

**Contactor:** Optional for pump

**Programmer:** Possibility of on/off, switch on with delayed switch off, rest option between starts...

Referencia	Descripción	PVP
WPC01Z	Piezo Electric Panel 1 pump	185 €
WPC02Z	Piezo Electric Panel 2 independent pumps	229 €

CAJAPIEZO	Stainless Steel Box for Piezo Electric Push Button	65 €

# WPC050

## Electrical Panel 50W

### Economy Panel with transformer

Our WPC050 range is a compact and complete electrical panel with transformer and motor guard designed to protect the pool's filtration system. Designed to work with LED lighting, it has a transformer with thermal protection and automatic reset and the possibility of installing a remote control for lighting control. Its UV resistant enclosure is IP65 protected for indoor or outdoor installation. Available on request for pumps from 1 - 14 A.

**Size:** 22x25x12 cm

**Pump:** Available from 1 - 14A

**Transformer:** 50W 12V AC

**Remote control:** Optional

**Contactor:** Optional for pump and Chlorinator

**Clock for Filtration:** With memory 150h

# WPC060

## 60W DC panel

### Economical Panel with DC Transformer

Our WPC060 range is a compact and complete electrical panel, with transformer and motor guard designed to protect the pool filtration system. Designed to work with DC LED lighting, it has the possibility of installing a remote control for lighting control. Its UV resistant enclosure is IP65 protected for indoor or outdoor installation. Available on request for pumps from 1 - 14 A.

**Size:** 22x25x12 cm

**Pump:** Available from 1 - 14A

**Transformer:** 60W 12V DC

**Remote control:** Optional

**Contactor:** Optional for pump and Chlorinator

**Clock for Filtration:** With memory 150h

# WPC100

## 100W Electrical Panel

### Economical panel with transformer

Our WPC100 range is a complete electrical panel with shielded transformer with adjustable Class HC output and motor protection designed to protect the pool filtration system. Designed to work with LED lighting, it complies with IEC-UNE-EN- 61558-2-4, 61558-2-6. ITC-BT-31, ITC-BT-48 and the possibility of installing a remote control for lighting control. The UV-resistant enclosure is IP65 protected for indoor or outdoor installation. Available on request for pumps from 1 - 14 A.

**Size:** 26x30x12 cm

**Pump:** Available from 1 - 14A

**Transformer:** 100W 12V AC

**Remote control:** Optional

**Contactor:** Optional for pump and Chlorinator

**Clock for Filtration:** With memory 150h

# Control Box Spa

## Spa Zone Control Panel

### Control panel for the control of spa areas

Allows you to take control of 2 pumps and lighting from a backlit 4-button push button. This system will avoid problems of distance between the push button and the control panel that commonly affects hydraulic systems beyond 5 metres. The panel includes all the necessary elements so that you only have to connect the push button and start working. Simple installation. IP65 weatherproof enclosure.

**Size:** 26x30x12 cm

**Pump:** Available from 1 - 14A

**Powr Supply:** 24V DC for push button

**Remote control:** Optional

**Contactor:** Optional for pump

**Programmer:** Possibility of on/off switch on and off, switch on with delayed switch off, rest option between start-ups starts...
